

# Budget Unit Brief

## FY 2017

## University of Iowa - Iowa Cancer Registry

### Purpose

The State Health Registry of Iowa (SHRI) is a population-based, cancer registry that has served the State of Iowa since 1973. The goals of the Registry include:

- Assemble and report measurements of cancer incidence, survival, and mortality among Iowans.
- Provide information on changes over time in the extent of disease at diagnosis, therapy, and patient survival.
- Promote and conduct studies designed to identify factors relating to cancer etiology, prevention, and control.
- Respond to requests from individuals and organizations in the state of Iowa for cancer data and analyses.
- Provide data and expertise for cancer research activities and educational opportunities.

The Registry includes epidemiologic data on cancer in Iowa since 1973. This information is available free or at nominal cost to hospitals, physicians, health agencies, and private citizens within limits of confidentiality.

### Funding

The project has been funded, in whole or in part, with federal funds from the National Cancer Institute that is part of the National Institutes of Health in the U.S. Department of Health and Human Services, in addition to funds from the state of Iowa and the University of Iowa. State support for the Registry over the past 20 years has ranged between a low of \$149,000 (FY 2012 through FY 2017) and a high of \$217,000 (FY 2001).
